

## MEASURING (TIMBER POSTS, WALLS OR BRICKWORK)

All sizes refer to actual openings and not the gate, fence or rail width; we have already allowed for hinges etc.

## FITTINGS

All gates, fence and railings are supplied with a pack of screw-on/bolt-on fittings to fix to existing timber or brickwork.

## OPENING DIRECTIONS

### GATE LATCHING

All single, low bow, bow top gates are supplied with a universal latch for left/right hand opening. All doubles have a padlockable sliding latch

### GATE HANGING

All single, tall single and bow tops have fixed hinges. All winchester/Fortress doubles, tall doubles and all Castle gates have adjustable hinges to help with levelling during installation.

## SQUARE STEEL POSTS

Due to the weight of the gates, care must be taken to ensure that the brickwork is strong enough to support them; steel posts which are concreted into the ground are recommended on all large gates.

Should you wish to hang gates on steel posts, please be sure to allow for the post widths eg. a 2438mm (8'0") opening pair of gates and two 70mm (3") posts will fill a 2578mm (8'6") gap.

## SPECIAL SIZES

A made to measure service is available for gates, railing and fence. Contact us with your details on our helpline, or email for a quotation.

## FINISHING

All gates and railings are primed in black and after fitting a further coat of good quality gloss paint is required. The gold effect on rail heads is not a factory option.

## AVAILABILITY AND DELIVERY

Most gates, fence and railing are available ex-stock for 7-10 day UK mainland delivery. Tall Doubles 14-21 day delivery. Made to measure items 21-28 days delivery. Carriage charges may be applied.

## PRICING AND SPECIFICATIONS

All pricing and specifications are subject to change without prior notice.
